SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, AngularJS, Bootstrap

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools & Platforms: Git, AWS S3, SonarQube

Concepts: REST APIs, Scalable Architecture, Agile, Code Reviews

AI & Productivity: Generative AI, Prompt Engineering, Claude AI

SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable MERN stack applications. Strong expertise in React.js and Node.js with proven impact in legacy system modernization, performance optimization, and AI-assisted development workflows. Experienced in Agile environments, code quality improvements, and delivering production-ready features.

EXPERIENCE

Senior Software Developer

Octoze Technologies Pvt Ltd – Chennai, India

May 2024 – Present

- Led migration of a large-scale application from AngularJS to React.js, improving UI performance and maintainability
- Built reusable component architecture, reducing development time for new features
- Designed and developed RESTful APIs using Node.js and Express.js
- Owned core Academic Planning module powering multiple dependent systems
- Implemented complex scheduling logic for timetable management across departments
- Optimized MongoDB queries for high-performance data aggregation
- Integrated AI (Claude) into development workflow for code generation, debugging, and documentation
- Reduced review cycles by introducing prompt-driven code validation and AI-assisted checklists
- Improved code quality using SonarQube, reducing vulnerabilities and code smells pre-merge
- Established linting rules and pre-commit hooks to prevent regressions
- Mentored junior developers and conducted structured code reviews

Tech Stack: React.js, AngularJS, Node.js, Express.js, MongoDB, AWS S3, Git, SonarQube, Claude AI

Software Developer

Octoze Technologies Pvt Ltd – Chennai, India

Feb 2023 – May 2024

- Developed full-stack features for a high-availability MERN job portal (NSDC collaboration)
- Refactored legacy dependencies (10+ years old), resolving security vulnerabilities
- Built scalable APIs and UI modules across multiple product features
- Collaborated with cross-functional teams in Agile sprints to deliver business-critical features
- Ensured timely delivery with consistent sprint performance

Tech Stack: React.js, Node.js, Express.js, MongoDB, Git

Software Developer Trainee

LearnSky Technologies Pvt Ltd – Chennai, India

Mar 2022 – Jan 2023

- Developed company's MERN website with dynamic content using MongoDB and backend APIs.
- Built reusable React components and optimized performance.
- Resolved bugs and performance issues debugging.

- Documented technical specifications and user guides to assist the team and clients.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Git

PROJECTS

Quiet Hours – Mobile Application

GitHub: github.com/khalithmoh-dev/QuietHours

- Built a mobile application to help users balance personal and professional life by automatically sending busy tone to tagged callers during specified quiet hours.
- Allows users to tag specific contacts and define time windows during which calls from those contacts are silently declined with a busy signal.
- Entirely built using AI-assisted development with Claude AI.

iTracker – Investment Tracker Web Application

GitHub: github.com/khalithmoh-dev/InvestmentTracker

- Built a web application to track personal investments, view overall portfolio performance, monitor total amount invested, and track profit & loss (P&L).
- Supports individual investment tracking to help users make better allocation decisions and improve portfolio diversification.
- Entirely built using AI-assisted development with Claude AI.

EDUCATION

B.E. in Civil Engineering	2015 – 2019
Dhaanish Ahmed College of Engineering	

CERTIFICATIONS

Camu Star Award	January 2026
Awarded for Outstanding Performance in 2025, demonstrating excellence with zero regressions.	

Camu Star Award	October 2024
Honored with the CAMU STAR Award for Q2 in recognition of continuous growth and consistent improvement.
